

TELECOMMUNICATIONS

- 1.0. Refer to [Chapter 1, Section 2](#) for basic telecommunication requirements and specifications
- 2.0. Special requirements for the CDCF include:
 - 2.1. The CDCF will support both on-line and batch mode operations.
 - 2.2. The CDCF will use an SNA network with VTAM as the network access method.
 - 2.3. The on-line mode will establish a communications link with the CDCF CICS system at the central processing facility over a LU_TYPE 6.2 line, in a conversational mode.
 - 2.4. Query/response for batch file processing with the CDCF will use the CONNECT:direct product as described in [Chapter 1, Section 2](#).
